

Amendment Under 37 CFR 1.116
USSN 09/736,298

IN THE SPECIFICATION

Page 1, before the first paragraph, insert the heading:

Background of the Invention

Page 2, before the last paragraph beginning with "The invention solves", insert the heading:

Summary of the Invention

Page 3, amend the first full paragraph as follows:

The invention therefore provides a communication method using an access including at least one B channel for transmitting voice and first data and one D channel for transmitting signaling signals and second data relating to at least one of the access and the data to be transmitted ~~and/or to said access~~, characterized in that:

at least one additional signaling channel is constituted,
an order of priority of the use of the signaling channels is determined, and
the highest priority functional signaling channel is assigned to the access.

Page 4, please amend the first full paragraph as follows:

The invention therefore also provides a communication method in which:
at least two accesses are used between two exchanges each having at least one B channel for transmitting voice and data,
which method is characterized in that:

Amendment Under 37 CFR 1.116
USSN 09/736,298

a common D channel is constituted for transmitting signaling signals relating to at least one of the accesses and the data to be transmitted and/or to said accesses,

signaling signals relating to at least two accesses are shared on said channel, and
the two accesses are managed using the signaling signals delivered by said common signaling channel.
